$\bigodot 2001\mathchar`-2005$ Mineral Data Publishing, version 1

Crystal Data: n.d. Point Group: n.d. Twinning:

Physical Properties: Cleavage: Fracture: Tenacity: Hardness = n.d. VHN = D(meas.) = n.d. D(calc.) = n.d.

Optical Properties: n.d. Color: Streak: Luster: Optical Class: Pleochroism: Orientation: Dispersion: Absorption: $n = \omega = \epsilon = \alpha = \beta = \gamma = 2V(\text{meas.}) = n.d. 2V(\text{calc.}) = Anisotropism: Bireflectance: R:$

 $\mathbf{R}_1–\mathbf{R}_2:$

Cell Data: Space Group: n.d. $a = b = c = \alpha = \beta = \gamma = Z = n.d.$

X-ray Powder Pattern: n.d.
